The Library's pool is one of the more intriguing pools out there. Yes, this beachfront infinity pool is bright red. The design-forward boutique hotel in Koh Samui certainly wasn't afraid to take a chance with the look of its pool, though it's undoubtedly uncanny to go for a swim here. If you'd

prefer your pool to be a more traditional color, book a private villa—each one comes with its own green-tiled watering hole. It's worth noting that bold contemporary design is the name of the game at this property, and for that reason, the striking red pool fits in with its surroundings.
